CONTENTS

Volume 5, Number 1, February 2017

- **Materials Science and Engineering**
  - The Properties of ZnO Deposits Electroplated on an ITO Glass Substrate with Direct- and Pulse Currents
    - Ching An Huang, Chin Huo Chuang, Fu Yung Hsu, and Kong Chen Li

- **Machinery Manufacturing and Power Engineering**
  - A Simulation Study on Improving Throughput in a Crankshaft Line Considering Minimizing Investment Cost under Throughput Target
    - Guan Wang, Dae Ryoung Lee, Yang Woo Shin, and Dug Hee Moon

- **Materials Science and Engineering**
  - The Effect of Coupling Agent on the Self-cleaning Ability of Nanowire Zinc Oxide-poly(butylene terephthalate) Fibers
    - Siripan Metanawin, Napatson Soonthonpinit, and Tanapak Metanawin

- **Machinery Manufacturing and Power Engineering**
  - Lyapunov Function Based Neural Networks for Adaptive Tracking of Robotic Arm
    - Muhammad Saleheen Aftab and Muhammad Shafiq

- **Machinery Manufacturing and Power Engineering**
  - Nonlinear Vibration Analysis for a Simply Supported Beam Elastically Colliding with Clamped Springs at Arbitrary Locations
    - Tatsuhito Aihara

- **Machinery Manufacturing and Power Engineering**
  - Aerodynamics Analysis for an Outdoor Road Cycling Helmet and Air Attack Helmet
    - M. N. Abdullah, M. K. H. Muda, F. Mustapha, and M. A. Shamsudin

- **Machinery Manufacturing and Power Engineering**
  - Automatic Spot Welding of Ventilation Spacers on Lamination Sheet Using Robotic Work Cell
    - Deepak Sachan, Avinash Patil, and Subrata Biswas
Prediction of Flux Core Arc Welding (FCAW) Bead Geometry and Welding Parameters for 1G Position……55
M. F. Abdul Razak, Abdul Ghalib, Abdullah, and M. A. H. Ramli

**Thermodynamic Theory and Application**

Numerical Simulation of Conjugate Free Convection in a Vertical Cylinder Having Porous Layer…………59
Mikhail A. Sheremet

Temperature Regulations of Pseudo Noise Generator Based Optical Transmitter Using Airflow and Heat Sink Profile..................................................................................................................................64
F. A. Bhagwan Das, S. B. M. F. L Abdullah, T. C. Mohd Shah Nor Shahida, F. D. M. Y. Siti Nurul Sharina, F. E. Qadir Bakhsh, and S. F. Bishwajeet Pandey

**Ergonomics and Application**

Ergonomic Work Analysis: A Case in Precast Industry from the Use of OWAS and RULA Methods…………68
Éverton de Sousa Abreu and Hélio Cavalcanti Albuquerque Neto
